Memorandum for Mr. Christoffers:

On pages 97 and 98 of the last Pacific Fisherman Annual I notice a reference to the loss of the steamer Dora on Vancouver Island December 20, 1920. It is understood that this vessel was operated by the Bering Sea Fisheries Company, with which Lars Mikkelsen is connected and whose office is 305 Boston Block, Seattle. Nothing was stated in the report, however, to show loss of this vessel. Kindly give particulars, stating date, place, value of property, and whether any lives were lost. I desire this information at an early date so that appropriate record may be made in the printed Alaska fisheries and fur industries report for 1920, the material for much of which is now completed.
